Total Units by week and week

The scatter plot displays the relationship between 'week' (x-axis) and 'Total Units' (y-axis). The x-axis ranges from 0 to 50, and the y-axis ranges from 8K to 12K. Data points are colored by 'week' (1 to 17). The plot shows a general downward trend in total units over time, with a significant drop around week 30.

Total Revenue by season and Product_Name

The chart displays the total revenue for seven products across five seasons. The y-axis is labeled from 0M to 40M in increments of 20M. The x-axis categories are Winter, Monsoon, Spring, Summer, and Autumn. Each season contains a group of seven bars, one for each product, color-coded as follows: Product 1 (light blue), Product 2 (dark blue), Product 3 (orange), Product 4 (purple), Product 5 (pink), Product 6 (light purple), and Product 7 (yellow). Winter and Monsoon show the highest revenue peaks, with Product 4 reaching over 40M in Winter. Summer and Spring show moderate revenue, while Autumn shows the lowest revenue across all products.
